

HAIKAL AZMI

Junior Web Developer

hycarl.me.career@gmail.com / +60172037953

Hi, for now, I am currently an Intern for Kaodim Sdn Bhd, as a Junior Web Developer [Front-End] and I have been as a QA Engineer Intern here for the past 3 months.

The job scope is assisting with the development of web product features including user and internal platforms. Develop efficient and reusable front-end systems and abstractions. Build and prioritize user-friendly interface and experiences across all web products, optimized for different web clients in collaboration with the Design and Product teams. Leverage development best practices and support continuous learning initiatives including code and peer review practices and lastly, assist with tasks for web and mobile QA processes. [Front End Developer]

The job scope is quite simple which is to ensure the quality of the application, which I have to check for bugs, errors and identify users' problems, and running test cases so that I can come out with suggestions for the backend to fix those issues. [QA Engineer]

Currently, I'm interested in React, JQuery, Express, and MongoDB to strengthen myself in this world of programming. I am a junior web developer for the past 3 years (freelance) and with that, I've learnt a lot about HTML, CSS, Javascript, MySQL and also PHP (University) and now, while I am in Kaodim as a front-end developer, I am learning ReactJS, Ruby on Rails, and Slim languages.

I have successfully created a system for UTHM in order to enhance their registration experiences from traditional way (papers) to modern way (online system) and created a small web project for Kaodim which is a to-do list to connect the interns and their supervisor.

I'm doing freelance in developing websites in my leisure time to get as many experiences as I can and I am looking forward to exploring new things. I'm also open to any freelance jobs regarding web development, I am keen to get the experiences, hence make myself better in this field, in the future.

Willing to relocate: Anywhere

WORK EXPERIENCE
